Reviewer A:

This article deserves to be processed, but must be revised• State Novelty

- In the introduction there are no literature facts that explain the gap of this study with other studies. It needs to be added in order to see the research gap.
- The literature review must contains descriptions of theories, concepts, findings, and other research materials obtained from reference materials to be used as the basis for research activities.
- Analysis and discussion from the author have not been seen
- The references should use at least 40 references, with 80% from the latest publication (2019-2023) from journal/proceeding indexing by Scopus.

Our decision is: Revisions Required

Please revise it again according to the suggestions from reviewer B as attached to the manuscript. Also revise the reference meta data, because there are still many things that are wrong and don't include the reference DOI.

Reviewer B:

West Sumatera is not same with Minangkabau, or vice versa.Statements must be supported by valid and representative data sources. To state that high heritage is the same as waqf dzurri must be based on relevant legal methods or arguments. The method that is the source of data to answer implementation is not perpetrator but rather the expert capacity.
